

## LED String Light (clear wire, 120V AC)

### Features

- Wide-angle LEDs used
- Very long life span (average of 80'000 hours)
- Energy saving
- Safer operation; significantly lower heat dissipation, compared to traditional tungsten filament bulbs

### Specifications

|                                |                                                         |
|--------------------------------|---------------------------------------------------------|
| <b>Maximum Extended Length</b> | 6 units in serial connection                            |
| <b>Unit length</b>             | 10 feet                                                 |
| <b>Length between LEDs</b>     | Approx. 3.75 inch (other length can be special ordered) |
| <b>Color Temperature</b>       | Warm white (approx. 3500K)                              |
| <b>Life Span</b>               | 80'000 hours (average)                                  |
| <b>Voltage</b>                 | 120VAC                                                  |
| <b>Number of LEDs</b>          | 30 LED per unit                                         |
| <b>Wiring</b>                  | Lead wires on both ends (clear UL wire used)            |
| <b>Operating Temperature</b>   | -40 ~ 40°C (-40 ~ +104°F)                               |
| <b>Power Consumption</b>       | 3 Watt per unit (30 LEDs per unit)                      |
| <b>Part number (SKU)</b>       | LW20-7100-FMS-CIGA-3500                                 |
